Question No. 1

Your network contains an Active Directory Domain Services (AD DS) domain. All domain members have Microsoft Defender Credential Guard with UEFI lock configured in the domain. You deploy a server named Server1 that runs Windows Server. You disable Credential Guard on Server1. You need to ensure that Server1 is MOST subject to Credential Guard restrictions. What should you do next?

- **A.** Run the Device Guard and Credential Guard hardware readiness tool
- **B.** Disable the Turn on Virtualization Based Security group policy setting
- **C.** Run `dism` and specify the `/Disable-Feature` and `/FeatureName:IsolatedUserMode` parameters

Answer: B

Question No. 2

You have a failover cluster named Cluster1 that hosts an application named App1.

The General tab in App1 Properties is shown in the General exhibit (Click the General Tab)

The failover tab in App1 Properties is shown in the failover exhibit (Click the Failover tab.)

Server 1 shuts down unexpectedly.

You need to ensure that when you start Server 1, App1 continues to run on Server2

Solution: From the General settings, you increase the priority of Server2 in the Preferred Owners list.

Does this meet the goal?

- **A.** Yes
- **B.** NO

Answer: B

Question No. 3

You deploy Azure Migrate to an on-premises network.

You have an on-premises physical server named Server1 that runs Windows Server and has the following configuration.

- * Operating system disk 600 GB
- * Data disk 3 TB
- * NIC Teaming: Enabled
- * Mobility service: installed
- * Windows Firewall: Enabled
- * Microsoft Defender Antivirus: Enabled

You need to ensure that you can use Azure Migrate to migrate Server1.

Solution: You disable NIC Teaming on Server1.

Does this meet the goal?

- **A.** Yes
- **B.** No

Answer: B

Question No. 4

Your network contains a single-domain Active Directory Domain Services (AD DS) forest named contoso.com. The functional level of the forest is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.

Sysvol replicates by using the File Replication Service (FRS).

You plan to replace the existing domain controllers with new domain controllers that will run Windows Server 2022.

You need to ensure that you can add the first domain controller that runs Windows Server 2022.

Solution; You raise the domain and forest functional levels.

Does this meet the goal?

- **A.** Yes
- **B.** No

Answer: B

Question No. 5

Your company uses Storage Spaces Direct.

You need to view the available storage in a Storage Space Direct storage pool.

What should you use?

- **A.** File Server Resource Manager (FSRM)
- **B.** the Get-StorageSubsystem cmdlet
- **C.** Disk Management
- **D.** Windows Admin Center

Answer: D
